

# ADDIPEL ONE-PAGER: DRY BLENDING

## Benefits For Our Customers:

- Productivity
- Quality
- Health & Safety
- Ease of Product Incorporation

## FEATURES

- Multiple component blends
- Wide variety of raw material options
- Unlimited combinations of ingredients
- Pre-weighed, custom packaging available

## ADVANTAGES

- Additive blends allow for less material handling
- Helps eliminate in house blending of additive packages
- Helps cut down on dust associated with mixing powder in house
- Helps improve dosing accuracy of powdered additives
- Pre-weighed, custom packaging allows for ease of incorporation in rubber and adhesives
- Reduce warehouse cost when stocking an additive blend vs. multiple additives

## BENEFITS

- Saves time and energy → more time to run end products
- Allows for a low dust environment
- Decreases chance of contamination issues
- Better dosing accuracy results in increased productivity
- Improves efficiency of manufacturing methods (adhesives/rubber)
- Helps reduce warehousing costs and logistics costs

### PRODUCT OVERVIEW

- Custom formulated powdered additive blends
- Based on customer formulations

### CAPABILITIES

- Low Intensity Ribbon Blenders
- High Speed Mixers
- Custom Packaging

### TARGET INDUSTRIES

- Wood Plastic Composites
- Sealants & Adhesives
- Rubber
- Plastic Compounding
