CASE Product Spotlight

Clariant Genapol® O 080

For over twenty-five years Clariant has been dedicated to the Coatings and Graphic Arts industry and continues the commitment to enhancing the performance of your products.

Clariant surfactants include the Genapol® O 080, an oleyl alcohol ethoxylate polyethylene glycol ether, ideal for enhancing compatibility in acrylic lacquers and emulsion paints. Key benefits are:

- Low VOC
- Free of alkylphenol ethoxylates (APEO)
- Ecolabel compliant
- Improves the compatibility of pigments with resins and solvents
- Increases tinting strength
- Prevents rub out effects
- Excellent substrate wetting on polyethylene
- Freeze-thaw stable
- Reduced water absorption
- No side effects on gloss

Clariant continues to inspire vision in your innovation pipeline beyond color through their broad mix of surfactants and polyglycols. Their diverse team of experts work under the assumption that every problem has a solution, even the most challenging ones.

For more info about Clariant's surfactants or to request a sample call your Barentz Account Manager today at (440) 937-1000 or [visit our website](https://www.barentz-na.com) or just send an email at marketing@barentz.us.

RHEOLATE® PHX 7025 - Powdered Thickening Agent

Elementis has launched a new Polyether Polyurethane-Based 100% Solids Associative Rheology Modifier for Latex Paints and Other Water-Borne Systems. Thanks to its refined particle size RHEOLATE PHX 7025 can easily be incorporated into formulations, resulting in improved handling, increased efficiency and meeting the latest health and safety demands. The product can be used as stand-alone thickener in formulations and has a Newtonian rheological profile contributing to high-shear and minimally to mid-shear.

- 100% active solids powder
- Sustainability - A lower carbon footprint
- Safer ingredients - APEO-, VOC-, tin-, & biocide free
- Higher efficiency & improved rheology
- Enhances film build with excellent

So, if you're looking for a high-quality 100% urethane rheology powder that is easy to use and provides exceptional performance, look no further than RHEOLATE® PHX 7025. Contact your Barentz Account Manager today and schedule a rheological consultation at (440) 937-1000 or [visit our website](https://www.barentz-na.com) or just send an email at marketing@barentz.us.

American Chrome & Chemicals – Chrome Green Oxide Pigments

Elementis Chromium has been rebranded **American Chrome & Chemicals** and they remain the only North American manufacturer of pigment grade pure chromic oxides. American Chrome & Chemicals offers the widest range of green pigment grades, the most consistent color, and tightest color specification in the industry.

- Made in the U.S.A.
- Outstanding color strength and consistency
- Micronized grades offer enhanced flow & dispersancy
- Lightfast / UV resistant
- Chemically stable
- High purity grades meet FDA requirements
